REF: AVAILABILITY OF CHOLERA VACCINE

The approved oral vaccine against cholera (Shanchol) from Sanofi-Pasteur-France is now available at CTTM.

It is administered by the oral route in 2 doses, 2 weeks apart, and offers protection against cholera for 5 years.

We advise protection for food handlers in schools, colleges and orphanages, as well as for health care professionals and persons living or working in crowded dwellings and other areas of high risk.

Please contact our vaccination department for further details. All information on CTTM, including directions and opening hours, can be viewed on our website cttm-kenya.com

Signed:

Professor Charles N. Chungu

Director, CTTM
